

Samuel Kevetter

Senior Engineering Consultant in AI, Cloud, and Cybersecurity - Dept. of War Security Clearance

✉ 📞 📍 Remote, US [🌐 LinkedIn](#) [🐙 GitHub](#)

Summary

Senior software engineer and technical leader specializing in AI/ML, high-performance network computing, cloud infrastructure, cybersecurity, Kubernetes, and cloud-native platform engineering. 9+ years of experience designing and operating mission-critical systems across commercial, defense, and maritime environments.

Experience

Horizon3.ai Remote
Senior Software Engineer April 2026 - Present

- Platform team lead designing and implementing realtime ETL processing and technical advisor for AI strategy

Amazon Seattle, WA
Software Development Engineer — Applied AI Security Applications May 2023 - March 2026

- Technical lead for AI initiatives, designing and delivering multi-agent LLM applications that automate security workflows and operational decision-making within Amazon Security.
- Architect and owner of a production Agentic Security Platform, defining best practices for LLM agent design, agentic workflows, capturing observability trace data on Kubernetes, and employing secure deployment patterns for production services at scale.
- Designed and deployed containerized AI workloads using OCI/Docker, ECS, and AgentCore, enabling reliable, scalable execution of AI agents in production environments.
- Designed and deployed cloud infrastructure supporting distributed 5G and edge network functions using AWS EKS, Telco Network Builder, and cloud-native network primitives.
- Led the design and automation of scalable infrastructure using Lambda, S3, EC2 Auto Scaling, and CloudFormation, reducing operational overhead and improving deployment consistency.

Ocean Shipholdings Global
Senior Operations Manager, Maritime Logistics and Technology July 2019 - January 2022

- Executive Officer and Department Head of a U.S. Navy surveillance vessel, leading 10+ personnel and overseeing operational execution, system readiness, and cross-functional coordination for national-security missions.
- Led technical teams responsible for the architecture, reliability, and security of mission-critical, high-availability systems supporting classified operations; owned technical strategy, risk tradeoffs, and execution across distributed teams.

US Navy Reserve Global
Military Officer July 2017 - 2026

- Supported United States, Far East, and NATO coalition forces through multiple deployments to contested regions, operating and sustaining mission-critical systems. Logistics and lifecycle management specialist supporting classified environments, including secure computer networks, software distribution, IAM, and security patching.

Experience

Crowley Government Services and Sealift	Global
Maritime Operations Manager	July 2017 - March 2019
• Managed day-to-day ship operations aboard a U.S. Navy surveillance vessel, ensuring vessel safety, regulatory compliance, and operational readiness. Coordinated with military and civilian personnel on national-security missions, developing leadership, risk management, and decision-making skills in high-tempo, contested environments.	

Projects

<u>Devsy</u>	<u>Picolayer</u>
Founder of Devsy, an open-source developer environment platform written in Go where I am building the world's fastest and most versatile devcontainer and microVM platform for development teams.	Founder of Picolayer, a devcontainer utility management application written in Rust. Focused on performance, safety, and efficiency for container-native and build-system workflows.

Awards

Navy and Marine Corps Overseas Service Ribbon	Armed Forces Service Medal
Naval Reserve Sea Service Ribbon	National Defense Service Medal
Global War on Terrorism Medal	Merchant Marine Expeditionary Medal

Certifications

<u>PCPP1 - Certified Professional Python Programmer</u>	<u>CompTIA Security+ ce</u>
OpenEDG Python Institute	CompTIA
<u>CompTIA A+</u>	<u>AWS Academy Machine Learning Foundations</u>
CompTIA	Amazon Web Services
<u>CyberOps Associate</u>	<u>Cisco IT Essentials</u>
Cisco	Cisco
Chief Mate Unlimited Tonnage	Master Under 1600 GRT
United States Coast Guard	United States Coast Guard

Education

Southern Methodist University	Masters • 4.0
Machine Learning and Artificial Intelligence	
United States Merchant Marine Academy	Bachelors • Cum Laude
Maritime Operations, Logistics, and Security	
Purdue University Northwest, IN	Vocational
Artificial Intelligence Cybesecurity
